

INSTRUCTION TO AUTHORS

Journal of ICSAR, is the right place for publishing papers in science education, especially in the field of Special Need Education. Research manuscript in the field of Special Need Education will be accepted for review.

GUIDING PRINCIPLES

An acceptable manuscript will meet the following general criteria: it reports a worthwhile contribution to science. The methodology used is explained with sufficient detail so that other capable scientists could repeat the experiments. Conclusions are supported by data, manuscripts is concise, well written, and understandable.

MANUSCRIPT FORMAT

Manuscripts should be uploaded to the system of the journal "Journal of ICSAR" and set in a standard format, Title, Author, Address and Email, Abstract, Keywords, Introduction, Materials and Methods, Results and Discussion, Conclusion, Acknowledgement and References. Typed on A4 size plain paper, in columns, 1 spacing, font Times New Roman 10 pt and should be given a line number. Margins on all four sides of 2 cm.

MANUSCRIPT TITLE

The title should be short and informative article. It should be written clearly and concisely and describes the contents of the study. written in Bold type, font Times New Roman 12 pt.

AUTHORS

The author should be written in 10 point font size, centered alignment, and without an academic degree. And email is written afterwards.

ABSTRACT

Abstracts must be integrated and consists of an introduction and objectives, methods, results, conclusions and suggestions. However, the abstract should be written as one paragraph with no header this. For this reason, references should be avoided. Also, non-standard or unusual abbreviations should be avoided, but it is essential they must be defined at their first mention in the abstract itself. The abstract should be written using 150 to 250 words that do not contain references and are accompanied keywords.

KEYWORDS

The keywords should avoid public, plural and some concepts. Review these keywords will be used for indexing purposes. Keywords can not be more than 5 words or phrases in alphabetical order.

INTRODUCTION

Introduction is written after the abstract and keywords. This section presents the literature review which contain at least three ideas: 1. Background or Rational research. 2. Issues and insights plan problem solving, 3. Formulation of research objectives (and expectations about the benefits of research results)

METHODS

The methods includes lines of inquiry, sampling method, analytical methods along with literature sources, modification of the analysis if there is to be explained in detail, which used experimental design, and data analysis.

RESULTS AND DISCUSSION

Result and discussion must be written in the same part. They should be presented continuously start from the main result to the supporting results and equipped with a discussion. Unit of measurement used should follow the prevailing international system. All figures and tables are placed separately at the end of manuscript pages and should be active and editable by editor.

Journal of ICSAR

ISSN (print): 2548-8619; ISSN (online): 2548-8600

Volume 1 Number 2 July 2017

CONCLUSION

Conclusion should be explained clearly. Suggestion placed after conclusion contains a recommendation on the research done or an input that can be used directly by consumer.

REFERENCES

All references mentioned in the references should be written using the American Psychological Association (APA) style and arranged from A to Z. The article has 10 new references or more and 80% of the journal. Most references are the main ones (last five years).
